Re: Community Resilience Centers Program – Conejo Community Park and Center Improvement Project

To whom it may concern:

As the representative of the 42nd Assembly District, I am writing in support of the Conejo Recreation and Park District's (CRPD) subject grant application.

The Conejo Community Park and Center Improvement Project is vitally important to increase positive community use and expanded resiliency within our community. The project proposes to replace the existing 7,000 SF building built in 1965 by local volunteer efforts with a new 19,000 SF building and a variety of community-serving park improvements. The proposed new building will be constructed to current standards and codes and provide expanded recreational improvements as well as the increased ability to serve as an evacuation shelter for the community.

These improvements will provide functional and aesthetic value to the greater community and greater park system. Also, the project addresses a meaningful need within the community for park facilities to evolve and provide for the community they serve. Most critically, the Conejo Community Park and Center Improvement Project will be a significant resource in addressing climate resilience and serving the District's most vulnerable residents.

Thank you for considering this letter and your efforts to support a healthy, thriving, and resilient California.

Sincerely,

JACQUI IRWIN
Assemblymember, 42nd District

C: Conejo Recreation & Park District
