Re: Community Resilience Centers Program – Conejo Community Park and Center Improvement Project

To whom it may concern:

I am writing in support of the Conejo Recreation and Park District's (CRPD) subject grant application.

I believe the Conejo Community Park and Center Improvement Project is vitally important to increase positive community use and expanded resiliency within our community. My office supports CRPD's proposed project and will participate in the planning, design and/or implementation as needed and is committed to the broad objectives of California Strategic Growth Council goals.

The project proposes to replace the existing 7,000 SF building built in 1965 by local volunteer efforts with a new 19,000 SF building and a variety of community-serving park improvements. The proposed new building will be constructed to current standards and codes and provide expanded recreational improvements as well as the increased ability to serve as an evacuation shelter for the community.

These improvements will provide functional and aesthetic value to the greater community and greater park system. In addition, the project addresses a meaningful need within the community for park facilities to evolve and provide for the community they serve. Most critically, the Conejo Community Park and Center Improvement Project will be a significant resource in addressing climate resilience and serving the District's most vulnerable residents.

Thank you for your attention to this matter and for your efforts in supporting a healthy, thriving, and resilient California.

Sincerely,

A handwritten signature in black ink, appearing to read "Henry Stern".
